Handmade in Spain

Arturo Álvarez has been designing and manufacturing decorative lighting for over 20 years. The natural surroundings where our factory is based is a constant source of inspiration, reflected in the forms, textures and materials of the designs. The pursuit of human well-being through the hedonistic enjoyment of the object underlies behind his work.

Handmade design lamps, created taking care of every detail, converting them into unique objects, made under the premise of offering exclusive products with a high emotional content, full of personality. All of this, without overlooking the research and development of new materials, bearing in mind our concern to introduce technologies that contribute to energy saving and a sustainable production.

Arturo Álvarez lleva más de 20 años diseñando y fabricando iluminación decorativa. El enclave natural donde se encuentra nuestra fábrica es una fuente de inspiración continua reflejada en las formas, texturas y materiales de las luminarias. Detrás de su trabajo está la búsqueda del bienestar del ser humano ligado al disfrute hedonista del objeto.

Lámparas de diseño hechas a mano, prestando atención a los detalles, convirtiendo cada una de ellas en un objeto único, bajo la premisa de ofrecer productos exclusivos con un alto componente emocional, llenos de personalidad. Todo ello, sin dejar de lado la exploración y el desarrollo de nuevos materiales, sin perder de vista la preocupación por implementar tecnologías que contribuyan al ahorro energético y a una producción sostenible.

Our atelier is located in the countryside, on the northwest of Spain, near Santiago de Compostela

Ura

NEW

Ura is handcrafted through delicate folds that originate four recognizable shapes from nature. They can be combined freely, and together they create a harmonious game of volumes that shrink and expand, while individually they convey a subtle lightness. The collection is made of painted stainless steel mesh.

Ura está trabajada a mano mediante delicados dobleces, de los que surgen cuatro formas reconocibles en la naturaleza. Combinables entre sí, juntas crean un juego armónico de volúmenes que se contraen y se expanden y en solitario respiran una sutil ligereza. La colección está realizada en malla de acero inoxidable pintada.

Onn

NEW

Onn is a collection of pendant and ceiling lamps made out of painted stainless steel mesh. They evoke the sea world: shells, seaweed, and corals emerge with great force, full of dynamism and vitality.

Ideal for walls and ceilings, they allow for interesting compositions through their unusual shapes.

Onn es una colección de lámparas colgantes y plafones realizados en malla de acero inoxidable pintada. Evocan el mundo marino; conchas, algas, corales surgen con fuerza llenos de dinamismo y vitalidad. Ideales para paredes y techos permiten generar interesantes composiciones a través de sus inusuales formas.

Pili

NEW

Pili, a single painted stainless steel thread is interwoven, creating random volumes and a harmonious wrapping irregularity, full of charm and mystery, through which the whimsical light escapes. It is available in two sizes, which allows for visually stunning compositions when several units are combined.

Un único hilo de acero inoxidable pintado se entrelaza creando volúmenes aleatorios sin orden, entretejiendo una irregularidad armónica y envolvente llena de encanto y misterio, por la que escapa caprichosa la luz. Se presenta en dos tamaños, permitiendo generar composiciones, de gran impacto visual, con la combinación de varias unidades.

Tempo

Tempo is a pendant lamp collection made with painted stainless steel mesh. This material, crafted in fine pleats, gives form to two overlapped layers that create two models of lamps full of dynamism. Two liveliness shapes that delicately shine light through each pore. Two forms that part of one. *Andante* and *Vivace*, the representation of two instants generated by the same movement at a different *tempo*.

Tempo es una colección de lámparas colgantes realizadas en malla de acero inoxidable pintada. La malla, trabajada en finos pliegues, da forma a dos capas que se superponen creando dos modelos de luminarias llenas de dinamismo. Dos formas vivas que irradian luz por sus poros con delicadeza. Dos formas que parten de una. *Andante* y *Vivace*, la representación de dos instantes generados por un mismo movimiento con diferente *tempo*.

Ballet

Its shapes are formed by the superposition or gathering of its vertexes, allowing freedom for the own flexibility of the material. The resulting volumes are fluid and natural due to the tension of the SIMETECH®. Its asymmetry makes its forms change depending on the point of view. *Plié, Relevé, Elancé...* a constant dance of light and shadows.

Las formas son creadas a partir de la superposición o uniones de sus vértices, dejando libertad a la propia naturaleza flexible del material. El resultado son volúmenes fluidos y naturales gracias a la tensión del SIMETECH®. Su asimetría hace que sus formas cambien dependiendo del punto de vista. *Plié, Relevé, Elancé...* un baile constante de luz y sombras.

Luisa

A series of overlapped layers produces a brightness that softly leaks and filters through them, creating a magical and enveloping atmosphere. Its material, SIMETECH®, developed and registered by the firm, crafted in a smooth way, provides a subtle and elegant texture.

Capas superpuestas crean distintas luminosidades que se escapan y se filtran formando un ambiente mágico y envolvente. El material desarrollado y patentado por la marca, SIMETECH®, trabajado en liso, consigue una textura sutil y elegante.

Kite

An irregular curved square dresses walls and ceilings in a whimsical but restrained way. Just as kites in the sky, filling space with a warm and joyful light.

Un cuadrado irregular y con curvas viste paredes y techos de forma caprichosa pero controlada. Como si se tratara de cometas en el cielo, llenan el espacio de una luz alegre y cálida.

Blum

The pieces express a subtle, ethereal and transparent beauty, created from such a cold material as steel. The creator Arturo Álvarez reflects, once more, about the many possible interpretations of objects. Maybe not everything is what it seems.

Las piezas expresan una belleza sutil, etérea y transparente creada a partir de un material frío como es el acero. El creador Arturo Álvarez vuelve a reflexionar sobre las muchas interpretaciones posibles de los objetos. Quizás no todo es lo que parece.

Different sizes of polypropylene strips are molded to create irregular and harmonic volumes, softening the light through its layers, emitting a warm brightness, while its light source remains hidden.

Tiras de polipropileno de distintas medidas se trabajan para crear unos volúmenes irregulares y armónicos, consiguiendo tamizar la luz entre sus distintas capas para aportar una luz cálida con su fuente de luz oculta.

Aros

Strips of polypropylene are moulded in different ways to obtain shapes with volume and grace, producing fresh and light designs that nuance the brightness in a warm way. Celestial bodies that spin around, again and again, and ourselves with them, in an eternal, timeless dance full of harmony. The capricious light escapes between the gaps.

Tiras de polipropileno se trabajan de distintas maneras para lograr formas con volumen y gracia, aportando unos diseños muy frescos y ligeros que tamizan la luz de forma cálida. Los cuerpos celestes girando una y otra vez y nosotros con ellos, en una danza sin fin, sin tiempo, llena de armonía. La luz, caprichosa, se escapa por los espacios abiertos.

Uxi

The beauty and warmth of wood rises from a sinuous shape, created by a succession of plywood strips, that let light slip away through the gaps in a subtle way.

La belleza y calor de la madera surge a través de una forma sinuosa. Formada por una sucesión de barritas de tablero marino, por las que se escurre la luz de forma sutil.

The base reminds us of tree branches, made of plywood, that fall together in a fanciful shape, yet with a calculated proportion. A simple form that, like a branch in the wind, moves in many different ways.

El pie recuerda ramas de árboles que, a partir de tablero marino, se juntan de forma caprichosa, pero con una proporción calculada. Una forma simple, que como una rama al viento, se mueve de muy diferentes maneras.

V

A shape from out of space, but yet close and possible, that thrills and inspires us and with who we identify through the extraordinary and fantastic. With the help of plastic injection technology we developed a lighting collection which, through its ribs combined with the geometrical form, immerses us in a world of dreams.

Una forma espacial, pero cercana y posible, que nos emociona y con la que nos identificamos, a través de lo extraordinario y fantástico. A través de la tecnología de inyección de plástico se consigue una familia de luminarias que a través de sus lamas, combinadas de forma geométrica, nos sumergen en un mundo onírico.

Arturo Álvarez

Arturo Alvarez is an established creator, well known in Spain and out of its borders for his conceptual contributions to the lighting design world. His work has a recognizable style, with strong personality. In the past few years he has been carrying out an intense research and experimentation work in the development of his own materials, what led him to achieve an Interior Design's Best Of Year 2014 for the material SIMETECH®.

He manages with ease forms, volumes and light sources in a simple and elegant way, turning spaces into amazing lighting settings. Energy saving and LED lighting are increasingly present in his work.

The recognition for more than 20 years of career path came with two consecutive "Good Design" awards, the first one in 2008 for Gea and the next, in 2009 for Fluo, convened by The Chicago Athenaeum: Museum of Architecture and Design. In 2013, in Las Vegas, he also achieved an HD Product Design Competition Award in the lighting category.

Bety, one of his most emblematic designs, is part of the permanent collection of the Museu del Disseny de Barcelona. He has recently begun his incursion in the Art field with the display of two installations, Conversas and Geas, in the collective exhibition 'Et facta est lux', at the Museo de Arte Contemporáneo Gas Natural Fenosa of A Coruña [Spain]. Also outstanding is the exhibition, in an informational way, of his artwork Encontros at ARCO, contemporary art fair of Madrid, due to a collaboration with the editorial Dardo Magazine.

Since 2008, arturo alvarez starts a new and more experimental collaboration path, with other designers, so they can contribute with their vision about contemporary decorative illumination, they have participated among others: Héctor Serrano and El Último Grito.

Arturo Álvarez es un consolidado creador, reconocido tanto dentro como fuera de España, por sus aportaciones conceptuales al mundo de la iluminación de diseño. Su trabajo posee un estilo propio y reconocible, de fuerte personalidad. Desde hace años viene realizando una labor exhaustiva de experimentación e investigación en el desarrollo de sus propios materiales, que le ha llevado a obtener en 2014 un Best Of Year de Interior Design por el material SIMETECH®.

Maneja con soltura formas, volúmenes y fuentes de luz de una forma sencilla y elegante, llegando a concebir en los espacios montajes lumínicos y escenográficos sorprendentes. El ahorro energético y la iluminación LED están cada vez más presentes en su trabajo.

Los reconocimientos a más de veinte años de carrera llegan con dos premios consecutivos "Good Design", en 2008 por el diseño de Gea y en el 2009 por Fluo, concedidos por The Chicago Athenaeum: Museum of Architecture and Design. En 2013, en Las Vegas, le otorgan el HD Product Design Competition Award en la categoría Iluminación.

Bety, uno de sus diseños más emblemáticos, forma parte de la colección permanente del Museu del Disseny de Barcelona. Recientemente ha comenzado su incursión en el mundo del arte con la exposición de dos instalaciones, Conversas y Geas, dentro de la muestra colectiva 'Et facta est lux' en el Museo de Arte Contemporáneo Gas Natural Fenosa de A Coruña. También es reseñable la exhibición, a modo divulgativo, de su obra Encontros en la feria de arte ARCO, fruto de una colaboración con la editorial Dardo Magazine.

Desde el año 2008, arturo alvarez comienza una línea de colaboración más experimental con otros diseñadores para que aporten su visión sobre la iluminación decorativa actual, entre otros han participado: Héctor Serrano y El Último Grito.

MATERIALS

arturo alvarez has developed, for some years now, a profound and extensive work on materials. Exploring the possibilities of quotidian elements, taking them out of context to give them new purposes. This research has lead him to create his own materials, allowing him new ways of expression.

SIMETECH®, the innovate material created by arturo alvarez, was awarded in New York with a BEST OF YEAR 2014 of Interior Design Magazine in the category of "Innovative Translucent Shading / Lighting Solution". 14 of our collections are made of SIMETECH®.

arturo alvarez's collaboration with Bergmeyer Associates received the "best use of materials" award at Couturism 2016 [United States].

arturo alvarez lleva años desarrollando un trabajo profundo y extenso en materiales. Explora las posibilidades de elementos cotidianos descontextualizándolos y otorgándoles nuevos usos. Esta investigación le lleva también a crear materiales propios, que le permiten nuevas formas de expresión. SIMETECH®, un innovador material creado por arturo alvarez ha sido reconocido en New York, con un premio BEST OF YEAR 2014 organizado por el magazine Interior Design en la categoría de "Material Innovador Translúcido para Iluminación". 14 de nuestras colecciones están hechas con SIMETECH®. La colaboración de arturo alvarez con Bergmeyer Associates obtuvo el premio al "mejor uso de materiales" en Couturism 2016 [Estados Unidos].

SIMETECH® detail. Nevo collection

SIMETECH® by arturo alvarez

In April 2014, arturo alvarez patented SIMETECH®, a handmade material, composed by a stainless steel mesh with a silicone covering application. The diverse possibilities this stainless steel mesh allows with its silicone covering converts SIMETECH® in a highly malleable and moldable material, suitable for creating large volumes, with different textures and light capacity, adapting itself to the design and identity of every lamp. This material creates zones of chiaroscuro providing a warm and hypnotic light that floods the room causing nice and welcoming atmospheres, full of personality.

En abril del 2014 arturo alvarez patenta SIMETECH®, un material hecho a mano compuesto de una malla metálica de acero inoxidable a la que se le aplica un recubrimiento de silicona. SIMETECH® es un material altamente maleable y moldeable, apto para crear grandes volúmenes, con diferentes texturas y diferentes intensidades lumínicas, adaptándose así al diseño e identidad de cada lámpara. Este material crea zonas de claroscuros aportando una luz cálida e hipnótica que salpica las estancias creando ambientes amables y acogedores llenos de personalidad.

Painted stainless steel mesh and thread

Malla e hilo de acero inoxidable pintada

Arturo Álvarez takes materials out of their usual context, exploring their possibilities up to the point of achieving surprising results. He begins with an apparently cold steel mesh or thread, that he folds, curves or embroils, forming organic elements. He transforms it with these crafting techniques in warm and pleasant forms... bringing it to life. A whole universe of designs develop from this way of working. They all radiate a subtle elegance and delicacy, full of movement, and shine an intense light through them. Painted stainless steel is a compact and resistant material, that wont wear out as time goes by.

Arturo Álvarez descontextualiza el uso habitual de un material, explorando sus posibilidades hasta conseguir un resultado sorprendente. Partiendo de malla o hilo de acero, aparentemente fríos, juega con él creando pliegues, curvándolo o embrollándolo en sí mismo, componiendo elementos orgánicos y convirtiéndolo, con estas técnicas hechas a mano, en formas cálidas, amables... vivas. De este trabajo surge un universo de diseños, de una sutil elegancia y delicadeza, llenos de movimiento, por los que se escapa una luminosidad intensa. El acero inoxidable pintado es un material resistente y compacto, que no se deteriora con el paso del tiempo.

Cord Cordon

It is a pressed recycled cellulose cord, moulded by techniques developed at the factory. It allows large volume structures, with a light and graceful appearance. Its pleasant touch and the wide range of colors it is made in, from intense ones to more natural tones, is very inspiring to create lamps full of life and movement.

Se trata de un cordón de celulosa prensada reciclada, que se moldea mediante técnicas desarrolladas en la propia fábrica. Esto permite generar estructuras de gran volumen, con una apariencia muy grácil y ligera. Su agradable textura y amplia gama de colores, que va de tonos con carácter a otros más naturales, resulta de gran inspiración a la hora de crear lámparas llenas de vida y movimiento.

Glass Vidrio

A semi-handcrafted glass from the USA was the chosen one. Its irregularities, eye catching watermarks, felt by touch, give the lamps personality, reinforcing their unique character. It is opalescent glass, in a range of vibrant colors, used in different combinations, going from sobriety to a multicolored symphony. The glass is worked with several techniques, assembled with metal, in a particular revision of the tiffany technique, or in small sequenced pieces that form sinuous and elegant waves.

Se ha seleccionado un vidrio de producción semiartesanal procedente de USA. Las irregularidades que presenta, en forma de aguas, sensibles al tacto y a la vista, dotan a las lámparas de personalidad, reforzando su carácter único. Son vidrios opalescentes, con una gama amplia de colores brillantes, usados en distintas combinaciones que van de la sobriedad a una sinfonía multicolor. Se emplean en diversas técnicas, con ensamblajes de estaño, en una revisión particular de la técnica tiffany, o en pequeñas piezas secuenciadas que forman sinuosas y elegantes ondulaciones.

Pressed cellulose Celulosa prensada

Versatile and highly moldable materials are chosen for decorative lamp production, especially those which maintain their features of resistance and durability. This is the case of pressed cellulose, which is still made with ancestral techniques and suitably refined becomes a flexible material, ideal to generate compact but stylized structures.

En la fabricación de lámparas decorativas se trabajan materiales versátiles, altamente moldeables, pero que mantienen sus cualidades de durabilidad y resistencia. Este es el caso de la celulosa prensada, que se sigue produciendo a través de técnicas ancestrales. Un refinado adecuado la convierte en un material flexible, idóneo para generar estructuras compactas, aunque estilizadas.

Plywood Tablero marino

At arturo alvarez’s plywood is used in an original way, outstanding its hidden beauty, showing the interior face of the board instead of its surface. The light provided from the lamp comes from the spaces between the perfectly placed strips of plywood, as if they were domino pieces. Its own laminated finish produces the tone of the light, and it is available in white, yellow and black. Plywood, used this way, generates warm pieces, with elegant and clean lines, a searched simpleness that reveals from the inside and that contrasts with the usual toughness of wood, but preserves its resistance.

En arturo alvarez se emplea el tablero de una forma original, poniendo en valor lo oculto, mostrando la belleza de la cara interna en lugar de su superficie. La luz obtenida de las lámparas proviene de los espacios que resultan de colocar ordenadamente los listones de tablero, como si de piezas de dominó se tratase. El propio acabado del laminado proporciona la tonalidad de la luz, y está disponible en blanco, amarillo o wengue. El tablero marino usado de esta forma genera piezas cálidas, con líneas elegantes y limpias, una sencillez buscada que se revela desde el interior y que contrasta con la habitual robustez de la madera, aunque mantenga intacta su resistencia.

Polypropylene Tiras de Polipropileno

It is a material that permits infinite possibilities for design as it’s highly flexible. It is used mainly in strips, woven among themselves, recalling the antique techniques of traditional basketmaking. Its lightness is another of its virtues, and large volume lamps, with a lot of presence but very light looking, can be made with it. The designs in polypropylene are commercialized in white and black, colors that provide a touch of elegance to the lamps with more body and appearance of arturo alvarez.

Es un material que permite infinidad de posibilidades en diseño gracias a su alta flexibilidad. Se usa principalmente en forma de tiras, tejiéndolas entre sí, evocando las antiguas técnicas de cestería tradicional. La ligereza es otra de sus cualidades y con él se consiguen lámparas de gran presencia y volumen, que resultan livianas incluso a la vista. Los diseños con polipropileno se comercializan en blanco y en negro, colores que aportan un toque de elegancia a las iluminarias con más cuerpo y presencia de arturo alvarez.

The device is not suitable for generally inflammable surfaces
Aparato no adaptado para la instalación en superficies normalmente inflamables

Luminaire to use with tungsten halogen bulbs with self protection shield
Luminaria diseñada para usar lámparas halógenas de wolframio con pantalla de protección propia

With ground devices
Con toma de tierra

The products in this catalogue are printed photographic reproductions. The color of the pictures may slightly differ from the real color.

All our lamps are totally handmade in Spain. The differences you may find in our luminaires or the range of materials we use, make them unique. Small differences between lamps of the same reference are not defects, they add value to them, because each one is a unique object. The indicated lampshade dimensions are only approximate, never exact.

While maintaining the basic characteristics of the product, arturo alvarez reserves the right to make any modifications at any time with the sole aim of improvement.

Electronic components are guaranteed according to the national applicable regulations (e.g., 2 years in Spain).

US / Imperial measurements in approximate inches.

Los productos de este catálogo son reproducciones fotográficas impresas. Es posible que el color de las imágenes varíe ligeramente con respecto al color real.

Todas nuestras luminarias están hechas íntegramente a mano en España. Las diferencias entre ellas y en los distintos materiales empleados convierten a cada lámpara en única. Pequeñas diferencias entre lámparas de una misma referencia no son un defecto, sino un valor, cada una es un objeto único. Las dimensiones de las tulipas indicadas son sólo aproximadas y nunca exactas.

Manteniendo las características básicas de los diseños, arturo alvarez se reserva el derecho a realizar las modificaciones que considere oportunas con el fin de mejorarlos.

Los componentes electrónicos ofrecen una garantía conforme a la legislación nacional aplicable (ej., 2 años en España).

Las medidas en pulgadas son aproximadas.
