

a·emotional light's novelties

We would like to share with you our **2025 New Collections** that reflect our commitment to innovation, emotion and design.

Agasallo Table and Floor

The **Agasallo** collection, designed by **Héctor Serrano**, winner of the **Spanish National Design Award 2024**, has been extended with new floor and table versions. **Agasallo** maintains the essence of the original collection, based on organic fluidity and the balance between light and matter, but now with an even more deeply rooted presence in the space. Lighting becomes more intimate, generating a dialogue between light and setting that transforms the perception of any space. Its versatile design allows it to be integrated into both domestic environments and hospitality projects.

Ane1 Large

We present a new 90 cm diameter version of the **Ane1** lamp, designed by **a-emotional light design team**. This lamp combines volumes and lines that define its personality. The texture of the painted steel mesh with the ring-shaped diffuser creates a unique space. The incorporation of this new format allows for vertical compositions or more organic distributions, alternating sizes and giving free rein to the imagination.

Baleira

Baleira, designed by **Tomás Alonso**, reinterprets the timeless geometric shape of the classic dome in steel mesh, radically changing its character and turning it into something ethereal and almost intangible. By eliminating the central bulb, the lamp opts for a perimeter LED light source, reinforcing the sense of emptiness and visual lightness. The light emitted by **Baleira** materialises both as direct illumination on the table and as generous ambient lighting, creating a soft and enveloping atmosphere.

Brétema

Inspired by the superimposition of clouds and the Atlantic sky, **Brétema** is a compositional system developed by **a-emotional light design team**. The interplay of overlapping layers and volumes, combined with a light that bathes the ensemble, allows for unlimited configurations with a high degree of expressiveness. The softness of the shapes and the visual lightness of **Brétema** bring a unique aesthetic emotion to any space.

Coral XL

The **Coral** collection, designed by **Arturo Álvarez**, consists of a series of pendant luminaires with an organic appearance, inspired by the beauty of coral reefs. Its composite design, made of painted stainless steel mesh, now comes in a new XL size, which allows for seamless integration into large-scale projects such as restaurants, hotels and other public spaces. Available in white, beige, grey and taupe.

Parga Ceramic and Parga Black

The **Parga** collection, by **Cenlitros**, is extended with a set of ceramic pieces and a new black colour in stone, seeking to preserve the modesty and simplicity of natural materials. The extension of the collection retains the original form, adding three sizes and three colours, for the benefit of greater diversity and combinatory flexibility.

Lisa

The **Lisa** wall lamp collection, designed by **a·emotional light design team**, advocates simplicity and everyday life. With a restrained expressiveness through the texture generated by the painted steel mesh and brushed steel details, **Lisa** offers a staple for any space. Available in two sizes of different heights, **Lisa** provides a welcoming light and simple form that accompanies us in our daily lives.

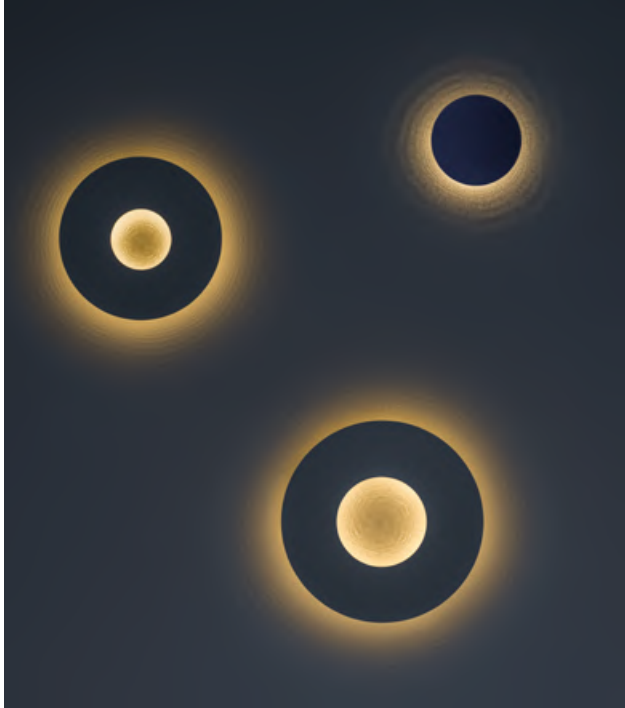

Parga Ceramic

Parga Black

Umbra

The **Umbra** wall lamp collection, designed by **Isaac Piñeiro**, highlights the value of penumbra in the face of the excess of lighting that surrounds us. By means of simple geometries and the play of chiaroscuro, **Umbra** offers an ambient light that generates ensembles through volumes and projections on surfaces.

Umbra Round

Umbra Line

Veiga

Veiga, designed by **Isaac Piñeiro**, is a discreet lamp that harmonises light, colour and form with its surroundings. This pendant luminaire offers a point light with excellent luminous qualities, despite the small size of the LED source. Its curved shape and wave-shaped lower cavity create a halo of light that creates a sense of lightness.

We invite you to visit our stand in **Pavilion 6, Stand A25**, to discover these and other novelties that **a·emotional light** will present at the **Salone del Mobile Milano 2025**.

Do not hesitate to contact us for more details and information about our collections.

About a·emotional light

At a·emotional light, emotion takes on a unique value. Craftsmanship, exclusivity and the power to evoke emotions through light guide our bespoke creations. For over 25 years, our workshop in Northern Spain has been an artistic hub, crafting lamps that glow with a unique identity, stirring emotions wherever they shine.

Born on the shores of the Atlantic ocean, diverse cultures have shaped our journey. We embrace our local heritage while welcoming global influences, propelling us to illuminate spaces in over 80 countries. Collaborating with designers who share our passion, we strive to create luminaries that stand the test of time, constantly evolving toward innovative and avant-garde designs.
